

Environmental Policy

COMPANY ENVIRONMENTAL - POLICY STATEMENT

A&A Electrical Services Limited is committed to being a successful Electrical Contractor. The Policy will be reviewed annually and will be updated where necessary. It forms the basis for Setting environmental objectives that will continually improve the way we do business.

Our policy is to comply with the current environmental legislation and where appropriate, act in anticipation of future environmental legislation. This will include the setting of targets and monitoring and reporting on progress towards meeting them. In particular we aim to:

- Plan and conduct the new installation of Electrical Services into industrial/commercial premises to minimize environmental impacts.
- Focus on procurement to consider environmental credentials alongside quality, price and other purchasing criteria.
- Ensure all waste is disposed of in accordance with the Environmental Protection Act.
- Work closely with all subcontractors involved in site operations to address any issues that may occur.
- Train and communicate with our employees to increase the environmental awareness of all those who work for the company.
- Communicate our policy and performance on an annual basis, to increase the Environmental awareness of our suppliers, subcontractors, professional advisors and customers and demonstrate the effectiveness of our environmental management approach.
